# Ranges...

## Bespoke

The 1810 Bespoke service allows you to create a unique sink design to your own specification.

1

## Axix Range

This unique concept allows for a combination of solid surface, quartz or stone and a contemporary designed sink.

2

## Zen Range

The Zen range is a contemporary linear design with striking square and rectangular bowls.

## Zen15 Range

The Zen15 range has a contemporary linear design with a subtle 15mm internal radius.

3

## Zen15 PVD Range

A selection of handmade bowls finished in a durable PVD coating.

4

## Zen I-F Range

The Zen I-F range are handmade insets with a slim 1.5mm profile for a flush look.

5

## Zen15 I-F Range

The Zen15 I-F range are handmade insets with a 15mm internal radius

6

## Zen15 XXL Range

The Zen15 XXL range are extra large handmade undermounts with a 15mm internal radius.

7

## Zen15 Belfast Range

A contemporary option to a traditional Belfast sink which looks perfect in both traditional and modern kitchen designs.

8

## Zen10 Options Range

A range of contemporary undermount sinks with a choice of versatile accessories to turn your sink into a multi-purpose workstation.

9

## Accessible Range

A sink and tap combination suitable for use in accessible kitchens

10

## Accessory Trough Range

The versatile Accessory Trough range is the perfect final touch to every kitchen.

11

## LuxsoPlus Range

The LuxsoPlus range is a contemporary design with 25mm radius corners.

12

## Etro Range

The Etro range has a curved classic design.

## Razor Range

A range of stainless steel inset sinks featuring a 10mm radius and contemporary 'Razor' edge profile.

13

## Forza Range

The handmade Forza range feature a 10mm internal radius and benefit from 1.2mm thick steel providing strength and durability.

## Bordo Range

A range of inset sinks featuring the latest in contemporary design.

## Velore Range

The Velore range combines modern design, high specification and competitive pricing.

## Blade Range

A range of inset Purquartz sinks in a choice of six popular colourways.

14

## Shard Range

Quartz insets in a choice of contemporary colours.

15

## Cava Range

Quartz undermounts for a contrasting finish to your solid surface.

16

## Argilla Fireclay Range

A range of highly durable white fireclay sinks featuring a non-porous surface with an everlasting shine.

## Etro Ceramic Range

The Etro Ceramic range has a curved classic design.

17

## Contemporary Taps

1810 taps are available in a variety of contemporary and classic designs. All are supplied with a Neoperl Aerator for a non-splash creamy flow

18

## Taps

A selection of 1810 taps that will match perfectly with your Purquartz sink.

19

## Traditional Taps

A range of timeless kitchen taps to compliment classic kitchen styles.

20

## Taps

QFIT taps can be installed single-handedly in approximately seven minutes and their unique installation method eliminates remedial work.

21

## Waste bins and Quick Ref Guide

# Welcome...

to The 1810 Company.

We supply an evergrowing range of sinks, taps and accessories, and that's it! We have a simple philosophy, which is to supply innovative and contemporary European design in a wide range of standard and more unique size combinations, appealing to those who appreciate superior quality and style.

The 1810 Company is a constantly evolving business and although we do update our printed literature 3 times a year, we can't always include our latest products.

So please visit our website for the latest news, technical advice and information.

All our products are in stock and despatched from our UK distribution centre on a next working day delivery service (cut-off times apply).

[www.the1810company.co.uk](http://www.the1810company.co.uk)

## Islington Trade Showroom

Our dedicated trade showroom is located in the Business Design Centre, London. The majority of our sinks and taps are showcased here together with our latest products and innovations.

As we hold regular trade events at the showroom, we would recommend that you telephone ahead of your visit to ensure that there will be someone available to meet with you.

### Address.

Suite 303, Business Design Centre  
Upper Street, The Angel, London N1 0QH

Tel. 07754 757322

Email. [sales@the1810company.co.uk](mailto:sales@the1810company.co.uk)

Opening hours: Mon – Fri: 9am – 5pm

### Visiting us

**By train:** We are 5 minutes walk from The Angel tube station (Northern line) allowing you to travel to and from Central London in minutes. Just a little further in the opposite direction is Highbury and Islington with great underground and overground connections.

**By car:** Driving to the venue is simple as we are located just outside the congestion charge zone on the A1, there is also a NCP car park onsite

## What our customers say about us...

“ Using the 1810 product gives us more scope and flexibility entering the project market for sinks & taps, the product is the perfect fitment for new builds and as a personal user of their tap & sink it's something we can easily promote in volume with the brand customer satisfaction. The aftersales is the best we have come across for many years.”

*Liam Hopper, Leicht Contracts Ltd*

“ We choose to use The 1810 Company for all our sink and tap requirements because we find the quality of your whole process from placing our order through to delivery to be absolutely first class and second to none. You and all your staff are extremely polite, helpful and efficient and are an absolute dream to deal with, and I would highly recommend your company to everyone. The products you supply are of a very high quality and competitively priced and that added to the service you give makes your company the perfect fit for us.”

*John Russell, C&J Stonemasonry Ltd*

“ From their knowledge of product to the speedy efficiency of delivery direct from stock, we enjoy the benefits of our working relationship with 1810.”

*John, EB Granite Ltd*

“ The 1810 Company are a fantastic supplier of sinks and taps. From the quality of their products to their excellent customer service, Neil and the rest of the team at 1810 are a pleasure to deal with. I couldn't recommend them highly enough.”

*Ian, Grantech Ltd*

“ We would thoroughly recommend 1810, they provide excellent products which our clients are very pleased with as well as being a professional and efficient company to work with!”

*Russell Jones, Russell Jones Kitchens & Bedrooms Ltd*

“ Pleasure to do business with, great product, great service and great staff. Very rarely do you have no issues with a supplier but I can honestly say 1810 have delivered in all areas from day one.”

*Mike Boyden, Bellagio Stone Ltd*

“ Dealt with The 1810 Company for a number of years now, we have always been extremely happy with the quality and pricing of their products and also the level of customer service that we receive.”

*David Scarborough, Affordable Granite and Marble Ltd*

“ Great quality products plus very helpful staff with next day delivery.”

*Michael Shaw, MD Change of Style*

“ Great quality, at a great price!!  
Next day delivery is a massive plus!!”

*Matt Crawford, Granite Zone Ltd*

“ The 1810 Company offer more than a first class range of products. We've been extremely impressed by their efficiency & customer service and if we ever require technical advice or assistance we can rely on Neil to provide the support we need. They are constantly seeking to improve and it's refreshing to work with a company that puts quality first. In short, a company you can trust.”

*Paul Hepburn, The Kitchen Station Ltd*

“ The 1810 range of composite sinks, along with a good range of styles and colour choice is a winner for us. In addition, 1810 offer a great range of quality taps, all from stock and with excellent delivery times. The Cavado undermount being especially useful as can be used for left or righthand installation.”

*Rob Lauder, Modern Homes Ltd*

“ Every step of the process when dealing with The 1810 Company is flawless. The staff are friendly and helpful and Neil is fantastic at keeping us up to date with new products. It's been amazing to watch them grow as a company. The next day delivery service is great. Happily recommend them to anyone looking for a hassle free supplier of good quality products.”

*Ceri Salter, Ruby Granite Ltd*

“ 1810 are a great business partner and supplier to SK. We love the ease of doing business, the communication and the great customer service. Their products show real innovation and we look forward to seeing what the future holds.”

*Nathan Hopper, Simply Kitchens Ltd*

“ As The 1810 Company have been growing in the industry, so too has our turnover with them. Their unbeatable value for money, coupled with a next day delivery service and the ability to react quickly to completely bespoke products means we have found their ranges very easy to quote for and sell through to our customers.”

*David Hannuna, Woodall Refrigeration Ltd*

“ We have been in a working relationship with 1810 since the opening of our new showroom in Wakefield and have a super relationship with all the staff. The products are of excellent quality and their aftersales is second to none. Deliveries are arranged at the very earliest dates and nothing is too much trouble if we need product urgently.”

*Gary Wade, Seamless Solid Surfaces*

# And now the boring stuff...

We don't want to be too technical but there are some features about The 1810 Company sinks and taps we think you would like to know.

Here at The 1810 Company we like to keep things simple so you will notice in our model codes 'BBR' & 'BBL' this is an easy reference for you when ordering...

**BBR** - Big bowl right  
**BBL** - Big bowl left  
See... simple!

Quality of manufacturing and integrity of the sinks is very important. We brace all two bowl sinks to eliminate stress on the bridge between the bowls and strengthen the construction (available on all Zen, Luxsoplus and Etro steel sinks).

During manufacture we go the extra mile to finish the edges on our undermount sinks even though it isn't seen when fitted. It also allows certain models to be inset / topmounted for a more luxurious look.

The quality of steel we use meets the most exacting standards 1.2mm, 18 gauge is used for our Zen, Etro, Forza and Luxsoplus models and all steel used is medical grade 18/10 304 quality. The best for stainless steel sink manufacturing.

## INSUSOUND®

Our sinks are treated on the underside with a protective powder coating, which we call 'Insusound'. This will help retain the heat of the water in the bowl, and dramatically reduce noise when fitting a waste disposal unit. (Available on all Zen, Luxsoplus and Etro steel sinks).

A Compact Plumbing Kit is available as a no cost option – please specify at time of sink purchase.

Most 1810 sinks are supplied with a BS approved maximiser plumbing kit, which is also available to purchase separately. This kit is comprehensive and includes all parts required for any sink installation.

Please refer to the 'How to assemble' video on our website.

A range of quality kitchen taps which not only look great, they can be installed by one person in just seven minutes.

1810 products are manufactured to the highest standard. In accordance with the Construction Products Directive (89 / 106 / EEC), all of our sinks are tested to BS EN 13310: 2003 / BS EN 13310 : 2015 and are CE certified.

The majority of our taps have WRAS approval. Look out for the logo on our tap pages. WRAS Approval is granted by representatives of water suppliers and is therefore accepted by every water supplier in the UK. WRAS Approval is the best way to ensure compliance and that your tap is manufactured to the highest standards.

High heat resistance (1200°C) hygienic and non-porous as well as chemical resistant makes our **CERAMICA | PURO** a popular choice. The ultra smooth white surface gives a clean look. Make sure you follow the installation guide.

Fireclay sinks are heat resistant to 1600°C and are hygienic, non-porous and chemical resistant. They are extremely hardwearing and feature an everlasting shiny surface.

The **purquartz** range is manufactured using German technology. Comprising of 80% natural Quartz particles, the sinks are heat resistant (230°C) food stain resistant and will withstand impact. These sinks are durable and made to last, backed by our 75 year guarantee.

**What is PVD?**  
PVD stands for Physical Vapour Deposition. A process used to create a very durable, corrosion and tarnish free finish. PVD is extremely durable but not invincible, scratches will appear as they do with stainless steel but will also develop a patina with time.

THE 1810 COMPANY SUPPORTS

REG CHARITY: 1062559 (ENGLAND & WALES), SC039757 (SCOTLAND)

Are a dedicated charity who support young people who have been diagnosed with cancer in the UK. For every 1810 Curvato Trio tap purchased, we will donate £5 to this very worthy cause.

Business management software for the kitchen, bedroom and bathroom industry.

A powerful sales tool to help kitchen dealers create advanced kitchen designs in minutes.

## Bespoke kitchen sink manufacturing service

The **1810 Bespoke** service allows you to create a unique sink design either for personal preference or to work within design and space limitations.

Please see below for examples of Bespoke project requests undertaken.

# AXIX

Seamless Technology

This unique concept allows for a combination of solid surface, quartz or stone and a contemporary designed sink to give a finished look of a steel bottomed material clad sink but without a join between the surface and the sink at the base, that previously was the only option.

This system allows for a straightforward fabrication method that can be completed in the workshop using standard tools and create a watertight solution that allows the use of hot/boiling water taps and creates an upmarket contemporary finish.

The AXIX sinks are manufactured to the same exacting standards of every 1810 sink using 1.2mm, 304 grade stainless steel. A PVD finish in Copper, Gunmetal or Gold Brass is also available. All sinks have protective powder coating on the underside (Insusound) which insulates helping to retain the heat of the water in the bowl whilst also reducing noise if a waste disposer is fitted. A full maximiser plumbing kit is also supplied providing all parts required for any sink installation.

AXIX is also backed by our 75 year guarantee that warrants the sinks to be free of manufacturing defects in material and workmanship under normal usage. Any warranty on the fabrication component is the responsibility of the fabricator or retailer.

## The ZEN15 Belfast Range

A contemporary option to a traditional Belfast sink which looks perfect in both traditional and modern kitchen designs.

SINK Model **ZENUNO15 600U BELFAST**

1810 Code **ZU/600/15/BEL/S/860**

- Satin finish
- 3/2" basket strainer waste and overflow included
- Individually boxed
- Steel thickness 1.2 mm
- Maximiser plumbing kit included

## The ZEN10 Options Range

A range of contemporary undermount sinks with a choice of versatile accessories to turn your sink into a multi-purpose workstation.

Because the kitchen  
is the heart of the home

- Prepare
- Cook
- Serve
- Entertain
- Clean

Please follow installation instructions provided to ensure compatibility of accessories

Please follow installation instructions provided to ensure compatibility of accessories

## SINK Model ZENUNO10 400 OPTIONS

1810 Code ZUO/40/U10/S/180

- 10mm radius handmade undermount bowl
- Can also be flush mount and inset
- Satin finish
- 3½" BSW and concealed overflow included
- Maximiser plumbing kit included
- Individually boxed
- Steel thickness 1.2mm
- Additional accessories can be purchased separately. See pages 91- 92

We recommend leaving a reveal of 420mm to ensure maximum stability of the accessory. If the sink is installed without a reveal the accessory will sit on the worksurface.

**Minimum cabinet size: 500mm**  
Includes 1 x Band B accessory

Shown with waste tidy, see page 209

Non-slip rubber spacers are provided to enable all accessories to be used on both upper and lower tier.

## SINK Model ZENUNO10 800 OPTIONS

1810 Code ZUO/80/U10/S/181

- 10mm radius handmade undermount bowl
- Can also be flush mount and inset
- Satin finish
- 3½" BSW and concealed overflow included
- Maximiser plumbing kit included
- Individually boxed
- Steel thickness 1.2mm
- Additional accessories can be purchased separately. See pages 91- 92

We recommend leaving a reveal of 420mm to ensure maximum stability of the accessory. If the sink is installed without a reveal the accessory will sit on the worksurface.

**Minimum cabinet size: 900mm**  
Includes 1 x Band B accessory

Shown with waste tidy, see page 209

Non-slip rubber spacers are provided to enable all accessories to be used on both upper and lower tier.

Please follow installation instructions provided to ensure compatibility of accessories

# Taps

QFIT – a range of kitchen taps to reduce installation time and eliminate remedial works.

**CURRENT METHOD IS INCONVENIENT**

- MORE COMPONENTS TO ASSEMBLE;
- ACCESS FROM UNDERSIDE;
- LIMITED SPACE;
- 2 PEOPLE REQUIRED;

**SOLUTION**

- ACCESS FROM TOP;
- 1 PERSON REQUIRED;
- TAP PRE-ASSEMBLED;
- REDUCE INSTALLATION TIME.

**01**

REMOVE PRE-ASSEMBLED TAP FROM CARTON

**02**

Lift the clamp plate to a vertical position tight against the flexible hose, then insert it into the tap hole.

Insert flexible hose into the tap hole.

**03**

Tighten the clamp screw with a power screw driver to lock the clamp plate on the mounting surface.

**04**

Place the tap over the flange and align with the location pin.

Tighten the grub screw at the rear of the tap.

**QFIT**

- QFIT taps supplied fully pre-assembled
- Reduced installation time – approximately 7 minutes
- One-man fit
- Easy installation from above worksurface
- Torque tightened for maximum reliability
- 100% safe and approved installation method
- Eliminates remedial works

Please view the QFIT installation video:  
[www.the1810company.co.uk/company-videos/qfit-installation/](http://www.the1810company.co.uk/company-videos/qfit-installation/)

## Care & Cleaning

General care of The 1810 Company stainless steel sink and tap

### Sinks

Discolouration and most marks on stainless steel are caused by water-borne deposits clinging to its surface. They are always the result of an outside source rather than coming from the steel itself. Such stains are often seen as a "rainbow-effect" and can be avoided completely by removing wet cleaning aids (cloths, containers etc.) from the sink after use so as to avoid watermarking and rust stains. One of the best ways to care for the sink is to clean it with a product called 'Quean Clean' (available from [www.queanclean.co.uk](http://www.queanclean.co.uk)) which can be used as required. It will also remove grease and limescale. It is helpful to dry the sink thoroughly after cleaning.

### Avoid:

- (a) the use of plastic bowls for washing up, as these cause heavy localised scratching;
- (b) leaving salt, vinegar, citric fruit juices, mustard or pickles on the surface for any length of time as they can cause corrosion;
- (c) abrasive cleaners such as bleach, scourers or wire woolpads.

### Taps

Care needs to be taken not to damage the tap finish – cleaning should be gentle with a rinsed soft mild soapy cloth only. If limescale is a problem around the nozzle then gentle use of a small brush with some lemon juice will help alleviate the problem – taking care to rinse away any remaining lemon juice from the tap.

### Scratching – stainless steel

The surface scratches which appear on stainless steel sinks rarely have any appreciable depth and will become less noticeable with age. A stainless steel sink will develop a patina with time and will look better a year after installation than during the first few months of use due to the fact that the scratching will have evened out. All sinks manufactured in stainless steel perform in exactly the same way in this respect be they manufactured by The 1810 Company or a competitor. We recommend the use of 'Quean Clean' which when used regularly will assist in maintaining your sink.

We would point out that the use of a plastic washing up bowl will over time cause the development of regular abrasion marks over the sink's surface. Inox Cream – for use on stainless steel to be used after 'Quean Clean'. To use the Inox Cream, apply with a damp cloth (like a J-Cloth) using circular motions, allow to dry (to a white powder), then buff off with kitchen roll. The Inox Cream forms a waterproof layer on your sink, which helps the water drain off easier.

### Rust Spots – stainless steel

The 1810 Company are extremely stringent in the quality and standards required from the steel suppliers. The material used is high quality stainless steel which is metallurgically incapable of rusting or corroding in normal household conditions.

It can, however, harbour ferrous particles from the water supply and these often occur with newer installations when the pipework is disturbed, or from 'wire' scouring pads or utensils. These filings get deposited and cling to the sink surface and unless removed will rust.

In this instance we would recommend that the sink is cleaned thoroughly using 'Quean Clean'. This should be sprinkled onto the sink and scrubbed into a paste with a stiff nylon nailbrush (NB simply using a nylon washing up brush is not sufficient as the product needs to be worked into the 'valleys' of the texture of the sink), which should be left on the sink for at least thirty minutes before thoroughly rinsing off.

We would point out that unless the particles are completely removed they will return. It is therefore very important that after cleaning the sink, it is dried thoroughly.

This process needs to continue at least daily for a period of 7 to 10 days until the problem disappears. The problem is sometimes particularly obstinate to remove and it may take several attempts to restore the sink to its pristine condition.

### Care & Cleaning of your CERAMICA PURO Sink Cleaning

Your new 1810 company Ceramic Sink is a high quality product, and has an impervious surface that is resistant to most household cleaning products and chemicals. Our products are carefully tested to be sure they perform to the highest standards. Please use a damp clean cloth for general cleaning.

Should you need to remove grease, soap and water marks, a proprietary bathroom cleaner should be used. Please be sure that the products are non abrasive, as they will dull the gloss surface of the product if used. Using a diluted bleach solution twice weekly applied with a sponge or soft cloth, then rinsed thoroughly with lots of water, will maintain the surface shine and keep your sink hygienically clean.

(NB: Care should always be taken when using bleach, please read manufacturers instructions for use.) Tougher limescale deposits can usually be removed using household vinegar or similar vinegar solutions. Care should be taken when using substances containing fluoride. Always ensure that any deposits are removed immediately before they can cause damage to the sinks surface. Any stubborn marks on the surface can be removed by liquid or cream bathroom cleaner, but marks such as those caused by iron or aluminium saucepans or similar objects can be removed using specialist cleaning products such as 'Astonish Oven and Cookware Cleaner' which is available from most supermarkets or online at '[www.astonishcleaners.com](http://www.astonishcleaners.com)'.

### Care

Your new sink has a glazed ceramic surface, which although very strong, can be damaged by sharp metallic objects such as cutlery. Special care must be taken not to drop metal objects onto the surface of your sink.

### Care & Cleaning of your purquartz Sink

Daily cleaning may be done with any non-abrasive cleaner. After every use, rinse and wipe the sink dry with a clean, soft cloth to eliminate any water spots or soap film build-ups.

#### REMOVING STAINS AND MINOR SCUFF MARKS:

Normal Stains - for stains, please use a mild abrasive cleanser, along with a soft scouring pad. Stubborn Stains - A solution of 50% bleach, 50% water should only be used for tough, stubborn stains. Let the solution sit in the bottom of the sink for one hour; then scrub. Rinse well.

LUSTRE: Mineral oil applied with a damp cloth can be used to restore the lustre.

MISCELLANEOUS: To remove Calcium Deposits (a white ring around the bottom of your sink) use a lime scale cleaner.

To remove adhesive labels: use Acetone (nail polish remover).

#### WHAT NOT TO USE:

- (1) Do not use any abrasive cleaning agents or scrub pads, such as Steel wool
- (2) Straight bleach
- (3) Commercial alkalis, such as ammonia and/or caustic solutions
- (4) Drain blocking chemicals that involve filling the sink with water

Note: Always test any stain removers in a small, non-visible location

### Care & Cleaning of your PVD sink

We would advise that the sink is cleaned after each use with soapy water. To dry, use a soft cloth or sponge. This will help prevent water spotting and mineral build-up on the surface of the sink.

- (1) Never use steel wool in or on the sink (as it may leave steel deposits on the sink, which can cause rust)
- (2) Avoid all abrasive and aggressive chemicals.
- (3) Avoid using harsh chemicals or bleaches.
- (4) Avoid prolonged contact with ordinary steel containers (eg. Tin cans) as it may rust and stain the sink
- (5) Avoid prolonged exposures to acids from fruits, fruit juices, salts, tea bags etc, as these may leave stains
- (6) Avoid leaving liquid soaps, hand sanitizing liquids etc on the surface, as these may leave stains.

## Warranty Information

The 1810 Company products feature the highest degree of technology, quality and design. As a result, we are proud to offer the following warranty.

### Sinks

The 1810 Company warrants its sinks to be free of manufacturing defects in material and workmanship under normal residential usage for 75 years.

### Taps

All taps installed in a private residence carry a 5 year warranty on all mechanical parts to be free of manufacturing defects in material and workmanship under normal usage. All finishes carry a 5 year warranty.

### General

In the event of a warranty claim the owner will be required to provide proof of purchase in the form of a sales receipt. This warranty covers all components which make the product operational. The 1810 Company, at its option, may repair or replace the product or components necessary to restore the product to good working condition. The 1810 Company reserves the right to inspect the installation prior to the actual replacement of the product or component part.

This warranty does not cover misuse or abuse, accidental damages, scuffs or scratches, improper installation, abnormal usage, negligence or damage caused by improper maintenance or cleaning. Normal wear of parts is excluded from the warranty. Damage caused by impurities or acts beyond our control are not covered. Any product or part which has been repaired or altered in any manner outside of The 1810 Company's factory, unless previously authorised in writing by The 1810 Company, will void warranty. Any replacement excludes transportation and any labour re-installation costs.
